

# Cavendish 250 Anaesthetic Trolley

## Compact and Versatile

The Cavendish 250 Anaesthetic Trolley is the latest development from MIE and incorporates many components of advanced design.

Although extremely compact, the Cavendish 250 is very versatile and can have up to three gases and pipeline connections.

The Cavendish 250 also includes as standard a removable stainless tray, and emergency O<sub>2</sub> flush and an oxygen warning device.

Optional extras for the Cavendish 250 are detailed overleaf.

- Emergency O<sub>2</sub> flush control
- Audible oxygen failure warning device
- Compact pressure reducing valves set to supply gases at 420 KPa (60 lb / in<sup>2</sup>)
- Terminal Block incorporating non-return valve
- Removable stainless steel tray and work surface
- Alternative N<sub>2</sub>O and O<sub>2</sub> pipeline inlets can be fitted
- Nylon coated frame with stainless steel uprights and working surface
- High quality chrome plated copper internal pipework
- Large 4½" diameter castors

Weight (Basic Trolley) 50 Kilograms (110 lbs)

Dimensions Max Width 48.75 cm (19½")

Max Depth 45 cm (18")

Max Height 146.25 cm (58½")

Made in U.K.
