

# Cavendish 500 Anaesthetic Trolley

The Cavendish 500 Anaesthetic Trolley offers comprehensive anaesthetic facilities for general anaesthesia and embodies many components of advanced design.

Our policy of continued reappraisal and product development is clearly reflected in the features of the Cavendish 500.

- Emergency flush control
- Audible oxygen failure warning device (O<sub>2</sub> operated)
- Compact pressure reducing valves set to supply gases at 420KPa (60 lb/in<sup>2</sup>)
- Swivel outlet
- Terminal Block incorporating non-return valve.
- Removable stainless steel tray and work surface
- Large 5½" diameter A/S castors
- Conveniently sited gauges for cylinders and pipeline.
- Nylon coated frame with stainless steel uprights and working surfaces.
- High quality chrome plated copper internal pipework.

Made in U.K.
